Kelly,

Gary asked me to forward information we had on ongoing research collaborations with Region 8. Of course Cindy (and you) are well aware of the work we are doing with Region 8 on the HF case studies and the Pavillion project. I am pulling together the latest materials I have on those projects and will send them to you later today.

In addition to those projects we have been engaged in other research projects and technical assistance efforts with Region 8. Attached are outputs (summaries) from two research projects that we are working on in the Region: the ASARCO/East Helena project (a research project studying the efficacy of a PRB to treat inorganic contaminants in ground water) and a RARE project on uranium in ground water near in-situ uranium recovery sites. I have a more detailed report (EPA publication: EPA/600/R-08/093) on the East Helena PRB study, if you'd like me to send that. Let me know if you need more information on any of this.

FYI - Kelly Smith was pulling together information on technical assistance the Ground Water Technical Support Center has provided to Region 8 (coming in a separate email).

- dgj -
